

# Mathematical Olympiad

*On March 12, 2021 in our kindergarten we celebrated the International Day of Mathematics on this occasion, various mathematical games and activities were prepared.*

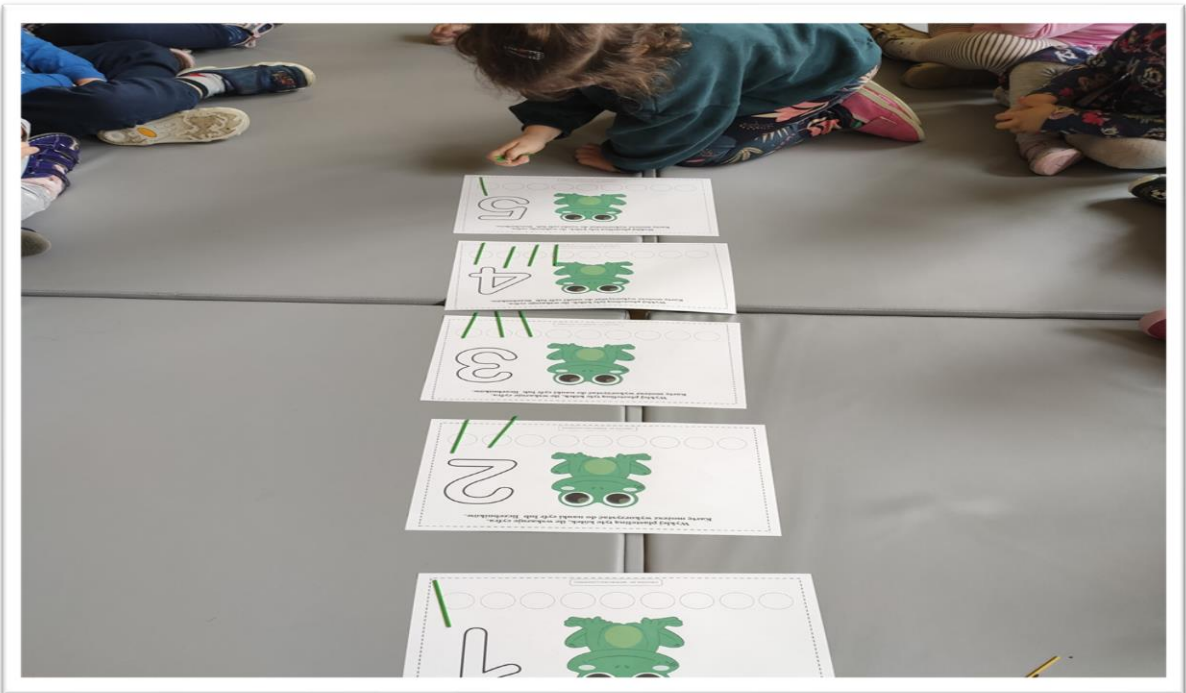

*The main point of the day was the Mathematical Olympiad in which all age groups participated. Tasks were age appropriate. Our preschoolers showed that they have spatial orientation, they can counting, recognition of colors and geometric figures, and arranged rhythmic sequences.*

*All the tasks that the children performed showed that mathematics can be interesting and pleasant. The day passed in a cheerful atmosphere and all groups did great.*

*Kindergarten Nr. 106, Warsaw, Poland.*
