

**PRZEDSZKOLE NR 106
W WARSZAWIE**

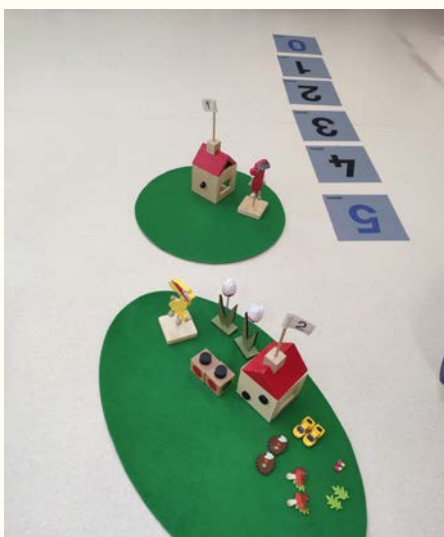

ERASMUS+ WEEK

In February 2020, our Kindergarten nr 106 together with Kindergarten nr 81, participated in a training called "The gifts of the Froebel". During the training, we had the opportunity to learn about the practical applications of Froebel's pedagogy in the daily work of the kindergarten. We learned that the "gifts" are materials in the form of woolen balls and sets of wooden lacks in the shape of cubes, cylinders, prisms, as well as mosaics, sticks, rings and points. They are used by children for perceptual-manipulative and research games, and they enable the development of artistic skills.

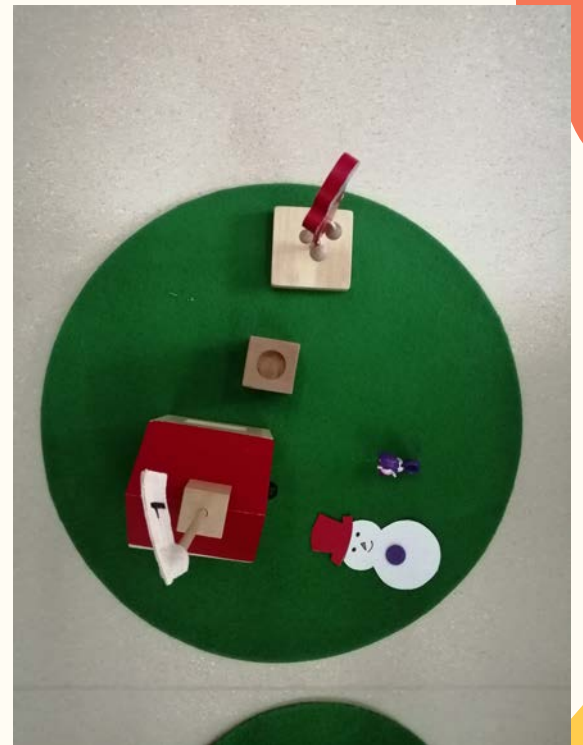

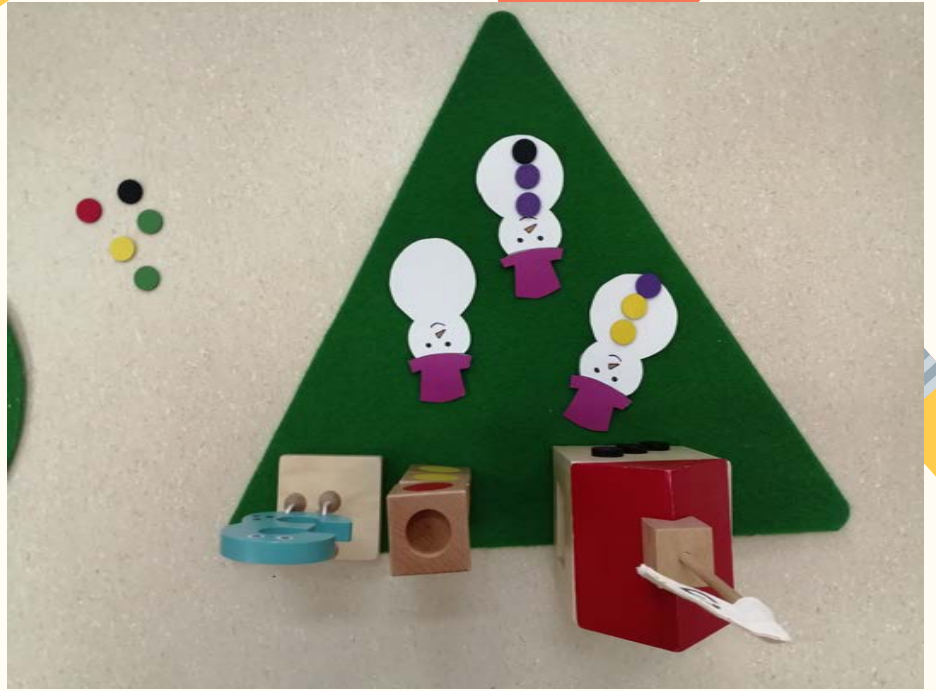

As part of the exchange of experience, we were able to introduce to teachers from another kindergarten Willy's World of Numbers and learn about their working methods in mathematics education.

In January 2021 Parents of one of the preschool groups (4-year-olds) were invited to mathematics education classes. They had to the opportunity to visit to the "Land Number Three" with their children. As part of the workshop, parents were introduced to Willy's World of Numbers.

In February 2021, as part of the Erasmus + project, children and parents took part in the project method called "Getting to know partner countries".

- Each group discussed one of the partner countries for a week, getting to know the culture of the country, its customs and traditions. Teachers prepared various mathematical tasks related to a given country. Parents from our kindergarten were very eager to participate in the project.
